

Antony provides both principal level and hands-on Project Management for a wide range of project programs and requirements, fully engaging with owner, consultant and construction team to proactively approach and resolve project challenges. His core responsibility is the oversight of the project process to ensure each team member is effectively delivering on their contractual responsibilities, working as a cohesive team and have the necessary information from both their fellow consultants and client to complete their scope of work.

In the preliminary project stages and in coordination with the client objectives, Antony will establish a project framework which will act as a roadmap for the entire project team. This will translate into specifics such as consultant coordination, milestone schedules, permitting, contractor / vendor bidding and selection, contract negotiation, cost management, construction scheduling / monitoring, project completion and occupancy.
